SOIL SCIENCE LABORATORY	
S.NO	**LIST OF EQUIPMENTS**
1	Identification of rocks and minerals
3	Collection and processing of soil samples
4	Determination of soil moisture, EC and pH
5	Field density determination by Core Cutter and Sand Replacement method
6	Specific gravity determination by Pycnometer
7	Textural analysis of soil by International Pipette method
8	Grain size analysis by using Mechanical shaker
9	Determination of Organic carbon
10	Estimation of Gypsum requirements
